Due to the increase of Non-Sentenced ADP and decrease of Sentenced ADP, the percentage of inmates who are not sentenced has been increasing steadily for more than a decade. The percentage of inmates who are Non-Sentenced reached 63% this quarter. This is the highest percentage of Non-Sentenced ever recorded. Almost two-thirds of the inmates are now Non-Sentenced as opposed to the traditional 50%. This shift has resulted in significant changes in the operation of jails over the past decade.
